

Port Services Maintenance Technician (Full Time Role)

Due to the continued growth of the business the Company has a new opening for a Maintenance Technician, who will work as part of the Port Services Team at Foynes Port, maintaining SFPC assets throughout the company's facilities.

Based in Foynes Port, the role of Port Services Maintenance Technician is to implement the SFPC maintenance strategy throughout all locations of the port's activities, with the objective of minimising equipment downtime while optimising equipment productivity. It involves working out of hours and at weekends regularly as part of an annualised hour's structure.

Key Duties will include:

- Scheduling of day-to-day port equipment maintenance requirements in accordance with SFPC policies and procedures ensuring engineering and maintenance KPIs are met. React to breakdowns as a matter of priority with a view to minimising equipment downtime. Continuous liaison with members of the Port Services team and associated stakeholders is critical to this position.
- Be a leader in the maintenance function to improve work methods and performance with respect to reliability, costs, energy and quality and in conjunction with the Engineering & Port Services office develop and implement progressive planned and predictive LEAN maintenance systems
- Contribute and participate in the assignment of equipment priorities, planning and scheduling, maintenance plans, reviews, and failure investigations
- Engage directly with manufacturers and suppliers of parts and services to ensure timely and efficient availability of port equipment as required, including identifying, organising, and supervising the attendance of 3rd party technicians.
- Ensure duties are completed in compliance with all SFPC EHS, operational policies and procedures at all times
- Completion of records and reports in strictly in accordance with SFPC policy and procedures

Requirements:

- Candidates qualified, with at least three years' experience, in any of the following disciplines will be considered:
 - Electrician
 - Mechanic
 - Fitter
- Have a strong background in
 - trouble-shooting heavy plant and machinery
 - heavy plant / facilities involving hydraulic, mechanical, and electrical power trains.
- Have the ability to work at height in an outdoor environment
- Understand and be able to read and interrogate engineering drawings for trouble shooting purposes
- Be familiar with and understand preventative maintenance processes, theory, and practice
- Be able to diagnose and solve problems and implement permanent solutions while working under their own initiative

Benefits:

- Competitive Salary
- Pension Fund & Associated Risk Benefits
- Company Mobile Phone
- Health Screening
- Discretionary Sick Pay Scheme
- On Site Parking
- Full PPE provided
- Tools provided
